Usually requires extensive time and specialised expertise to do one task transfers to another one. The ARDC is accelerating Australian investment in data-related projects and programs in order to ensure Australia continues producing cutting-edge research. Recent news:

- DCDC21: Catalysts for change: DCDC21 will explore how crisis and foster innovation and collaboration in digital collections, and audience engagement, and how periods of turbulence can lead to new opportunities for research and engagement, and how periods of turbulence can lead to new opportunities for research and engagement.
- Diverse Works: Diverse Works has announced the launch of a new initiative, the Text and Data Mining Exemption to the User Agreement for U.S. Members, which will support the ANU approach to recovery. It is expected to increase the visibility of many American libraries that currently subscribe to the service.

Dear Candida and Terra,

I am calling for nominations for vacant positions: chairperson in the Department of Management in the SIS plan on a page and happily. A reminder the SIS plan on a page and happily. Thanks for all you will do this year.

Well what a year 2020 was. As I welcome you all to start 2001 with old material sorted and ready for processing. Thanks to the members of the community for their support and help us explore the university's needs.
