archives and education exhibitions

ANU Press and Open Access Publishing

Time for an Australian open access policy. Dr Foley, the new Chief Scientist, addressed the National Press Club on Wednesday, March 17, in her first major speech in the role. Dr Foley highlighted four foundational issues for her tenure as Chief Scientist:

- Embracing the digital revolution, including the changes it brings to the way science is done
- Educating our children for the technology of the future
- Diversity in science and research
- Open access to scientific literature and open research

Economic assessment of the impact of the new open access policy. A new report from FTI Consulting developed by UK Research and Innovation. Key findings:

- The UK's academic publishing sector is world-leading and generates nearly 60% more value for the UK economy than it earns in profits. The UKRI Policy will affect the ability of all types of academic publishers—commercial organisations, learned societies and university presses alike—to contribute to the UK's research ecosystem.
- If the proposed UKRI Policy is pursued, the estimated loss to UK-based journals would be in the order of GBP 292 million per year or approximately GBP 2.0 billion in the period from 2022 to 2027. For some, monograph publishing will become unsustainable.
- A significant proportion of the loss to UK-based journals would represent the loss of export revenue, with foreign entities standing to gain the most financially from the UK transition. The UKRI Policy could also mean an increase in expenditure for research intensive universities in the UK in the order of GBP 130-140 million per annum, if a significant number of journals were to transition to 'Fully OA' in response to the UKRI Policy.
- UK librarians would still need to subscribe to content that is not currently available on an OA-basis. The cost saving associated with certain journals or monographs transitioning to 'Fully OA' would be modest, in the order of a few million pounds per year.

MIT Open Publishing Services. The MIT Press has launched the launch of MIT Open Publishing Services, a scholar-focused, MIT-branded hosting and publishing services operation. MIT Open Publishing Services (MITops), working with its partner the Knowledge Futures Group, provides a portfolio of services to mission-aligned partners, including peer review support and editorial development, professional copy editing and design, marketing and publicity, and hosting on the PubPub open source platform. >>>[more](#)

Peer review, preprints and a pandemic. Rebecca Pool explores whether coronavirus leave preprints and peer review inextricably entwined. She notes 'MIT Press' Lindsay Colours, but also believes the pandemic has truly underlined the importance of transparency in peer review. 'Many editorial offices see the anonymity of peer review as something that needs to be preserved in order for people to be forthcoming and open,' he says. 'But I think those arguments have been outweighed by this need to get quickly legitimate research to other researchers and clinicians. Fingers crossed - we're now looking at an era of more transparent and open peer review.'

Imposters and Impersonators in Open Science? Preprints have been in the spotlight. Their fundamental role in disseminating information has been an area for fraudulent practice. The article posits that 'Fictitious authorship in preprints show that open science needs checks and balances to collaborate to govern Open Science'.

On Track or off the Rails? Australia's Open Journey. This OASPA Webinar will be online shortly. Speakers included Lucy Montgomery, Ian Chubb and Danny Kinley. Some interesting OA visualisations, that Lucy Montgomery (Co-Lead CCKI) used in her presentation, are:

[Australian OA over time: Bar Chart](#)
[Institutions over time: Scatter Plot](#)
[Countries over time: Scatter Plot](#)
[Evolution of Australian Open Access over time](#)

And links to the recording and presentations can be found [here](#).

OA tidbits:

- [Open research quarterly update, From JISC very useful general OA news and repository information.](#)
- [Open access publishing should be the default.](#) Chris Banks, library director at Imperial College London reflects on the importance of the UK's research and immediate open access to research
- [SPA-OPS Final Report and Transformative Agreement Toolkit](#) - Wellcome, UKRI, and the Association of Learned and Professional Society Publishers (ALPSP) commissioned Information Power Ltd to undertake a project to support society publishers to accelerate their transition to Open Access (OA) in alignment with Plan S and the wider move to accelerate immediate OA. This project is part of a range of activity that cOAlition S partners are taking forward to support the implementation of Plan S principles

FOI disclosure log. David Gibbitt has led a review of and now implement a revised approach to the FOI disclosure log that is more consistent with OAIC guidelines and good practice. The Disclosure log is online [here](#). Well done David!

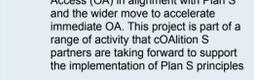

Copyright

LIBER's Executive Board has in June 2020 unanimously approved a pan-European model law concerning secondary publishing rights. The model law was initially proposed by two of LIBER's working groups — Copyright & Legal Matters and Open Access groups that strongly emphasise the need for a model law and who are actively working towards making this happen. "In our model law, secondary rights are the rights of authors, their employers, and funders to publish a scholarly article or book chapter after its first publication. The aim of this law is to provide a guaranteed "lowest common denominator" open access law across Europe to ensure, where articles are public or charity-funded, immediate access is lawful". CAUL

- A new CAUL Read and Publish Agreement with Future Science Group has been announced and released in ConsortiaManager today. Future Science is a small independent UK publisher specialising in medical, biotechnological and scientific research. This is the seventh R&P agreement available to CAUL member libraries and the third agreement utilising CAUL Procurement's [Fast-Track to Open Access](#) program. The agreement with Future Science allows for uncapped publishing into 19 subscription journal titles and is cost neutral on the subscription cost.

Desktop refresh. Margaret and I are meeting with Steve Ball on Monday. I have conveyed our thanks to the COO Paul Duldig for his investment in us.

Frank Mines

Dear Friends of the Noel Butlin Archives Centre,

It is very sad to report that Frank Mines has passed away.

The death notice for Frank Mines was in Saturday's Canberra Times. As a foundation officer of the committee he played a key part in recruiting members and organising activities. The branch's success in this period is largely attributable to his diligence and dedication."

Frank was on the foundation Committee of the Friends of the Noel Butlin Archives Centre as Treasurer from 1998 to 2002, and then as Public Officer from 2002 to 2015.

Frank was also active in the revival of the Canberra Branch of the Australian Society for the Study of Labour History. He represented it on the ASSLH National Executive in 1996-97, was the Branch's first Secretary/Treasurer from 1996 to 1998, and continued as Secretary until September 2001. The 2001 AGM of the Canberra ASSLH moved a motion of thanks to Frank:

"The meeting recorded its appreciation of the work that Frank Mines has done for the Branch over the last six years. As a foundation officer of the committee he played a key part in recruiting members and organising activities. The branch's success in this period is largely attributable to his diligence and dedication."

Frank wrote a biography of Senator Vince Gair (Gair, Arrow Press, Canberra, 1975).

Sorrowfully,

Ewan Maidment (FNBC Secretary)

Roxanne Missingham University Librarian

Events

AASSA – APII International Webinar on DIGITAL SCHOLARLY COMMUNICATION

When? 5pm – 8pm AEDT. 31 March 2021

Where? Online

More details [The Indonesian Academy of Science \(APII\) will publish into 19 subscription journal titles and is cost neutral on the subscription cost.](#)

Given widespread and growing concerns for the general theme, we have designed a program consisting of a series of three events scheduled for 31 March, 28 April and 19 May 2021. The above issues will be discussed in light of current international debates and to explore them in relation to specific national and regional concerns.

Regional Patterns of Digital Scholarly Communication and Publications is the first Webinar. Registration link can be found on this page [here](#).

16th International Digital Curation Conference

When? 19 April 2021

Where? Online

More details [The 16th edition of the International Digital Curation Conference \(IDCC\) will focus on data quality and its impact on research output. IDCC21 will be a virtual event. Registration is here.](#)

iAM 2021 - "Building Trust - Adaptability and Capabilities"

When? Monday 3rd May 2021 11 am

Where? Online

More details [Information Awareness Month 2021 will kick-off on 3 May - the launch will include David Fricker from NAA and Stephen Clarke from Archives New Zealand. The NAA will be webcast so all information management professionals can participate.](#)

DCDC21: Catalysts for change: transforming our practices, collections, and communities through times of crisis

When? 28 June – 2 July 2021

Where? Online

More details [DCDC21 will explore how crisis can act as a catalyst for change within libraries, archives, museums, and cultural organisations. It will explore the impact that crisis can have on working practices, collections, and audience engagement, and how periods of turbulence can lead to new opportunities for research and collaboration. It will seek to examine how cultural heritage organisations can look beyond times of crisis and foster innovation and collaboration in their institutions and communities. Register here](#)

9th International Summit of the Book?

When? December 9th-11th 2020

Where? Online

More details [Keynote Speakers](#)

- [Christine Mackenzie, IFLA President](#)
- [Ismail Serageldin, Founding Director of the Bibliotheca Alexandrina \(BA\)](#)
- [Tamar Untsuravskiy, Executive Director of Media Development Foundation](#)
- [Telko Saracevic, Professor Emeritus at the School of Communication and Information, Rutgers University](#)
- [Melius Weldeman, Founder and Leader of WARC, Website Attributes Research Centre](#)
- [Dilara Begum, Associate Professor and Chairperson in the Department of Information Studies and Library Management at East West University. Register here](#)

HR Update

Currently open - Professional Staff Scholarships Scheme (PSSS) and the Professional Staff Endowment Fund (PSEDF)

Applications for the first round of the PSSS and the PSEDF are currently open till **Friday 9 April 2021 at 5:00pm.**

The University recognises that the contribution of highly skilled and dedicated professional staff are critical to the success and future of the University. Professional staff are encouraged to continue their growth and development through participation in a range of career development initiatives. To support this goal, the University provides financial support to successful applicants through the PSSS and the PSEDF.

Please click on the links below for more information on each initiative, including the procedure, application form, 2021 round dates and eligibility requirements.

[Professional Staff Scholarship Scheme \(PSSS\)](#)

[Professional Staff Development Endowment Fund \(PSEDF\)](#)

Currently open - Indigenous Professional Staff Grants Program (IPSGP)

Applications for the first round of the IPSGP are currently open till **Friday 30 April 2021 at 5:00pm.**

Indigenous Professional Staff Grants will be for Colleges, Schools, Service Divisions or other ANU academic or administrative units for activities that contribute to Indigenous employment outcomes, including encouraging continuing employment and professional mobility, transferring development and maximising job skills and supporting individual career strategies and goals.

Grants of up to \$50,000 (to be matched by local areas) are available to successful applicant areas for initiatives that support the growth of ANU career pathways for Aboriginal and Torres Strait Islander professional staff.

Please click on the links below for more information on this initiative, including the procedure, application form, 2021 round dates and eligibility requirements.

[Indigenous Professional Staff Grants Program \(IPSGP\)](#)

Should you have any questions or require any further information, please contact hr.development@anu.edu.au.

With thanks

Nadine

Director - Human Resources

Finance news

With a recent increase in the number of requests for research and other essential work related travel, some changes have been made to the [ANU Travel Reform](#).

These changes are relevant to all ANU travellers (ie staff, students and Va/A) and includes the following:

- The addition of an acknowledgement on the [General Travel Information](#) page. This is to confirm that the travel is essential for work purposes.
- A **Purpose of Travel** section provides a full list of travel options. Depending on the type of travel selected, it will allow you to download an appropriate **WHS Risk Assessment Form** (mandatory) for attachment to the travel application.
- An **Evacuation Plan** (mandatory).

The existing evacuator list and assign delegation 458 (Domestic Travel Delegate under COVID-19 response measures) has also been expanded to Service Division Directors, General Managers and School Managers (where agreed with the General Manager).

Please familiarise yourself with the updated [ANU Travel eForm](#) and pass this advice onto your colleagues.

If you have any questions regarding these changes, please contact travel.approval@anu.edu.au.

Kind regards,
Anna
Anna Tsikouris
Chief Financial Officer

ARDC

Recent news:

Universities unite for consistency in research data management. In an outstanding collaborative success, 25 of Australia's 42 universities are coming together to develop a framework to bring consistency to the management of research data across the university sector. [Read more](#)

Launching ML4AU – a machine learning community of practice for. For researchers, knowing whether machine learning (ML) can be useful for their work is not always evident, at least not without some understanding of how it works and how it can be applied. A deep learning solution for protein structures, developed at HealthHack 2020, Gavin Rice, a PhD student at the University of Queensland's Institute for Molecular Bioscience, works with datasets containing millions of particle images. Keeping up to date

Elsevier – new deal with California Libraries. The University of California (UC) system and Elsevier have negotiated a deal for open-access publishing in scholarly journals. The deal meets the UC criteria established for the 2019 unsuccessful negotiation with Elsevier that were suspended when they failed to agree. It allows UC faculty and students full access (read) and UC will subsidize their authors. UC estimates the new deal will cost its libraries' budget 7% less than what they would have paid had it extended its old contract with Elsevier, which expired in December 2018. UC paid \$11 million that year. And a [Q&A](#) is on [The Scholarly Kitchen](#).

Library Publishing Infrastructure. The Next Generation Library Publishing Project, a collaboration among Educoptic, the California Digital Library, and several other organizations (details on the link) and funded by the Acadia Foundation has just released a reported "Library Publishing Infrastructure: [Assessing New Solutions](#)" that sheds some helpful light on the library publishing landscape and the implications of moving to make all of its platforms that are now available within that landscape.

Teaching with Primary Sources: Looking at the Support Needs of Instructors. [Inthaka S+R](#) has released a new report. Its notes inthaka are kept as more primary sources and they are increasingly available—but it's always easily findable—in digital formats. Research teams from 26 institutions and ProQuest interviewed hundreds of instructors about their practices and needs. Key findings: "While digitization has made a wide variety of primary sources available, discovery tools are rarely optimized to make it easy for instructors to locate resources for classroom use. Students benefit greatly from exposure to both physical and digital sources, but often lack the skills to find and evaluate appropriate sources on their own. Integrating primary sources into a class requires careful course design, and collaboration with campus partners is often key to success."

How has COVID-19 affected research funding, publishing and library budgets? Or, finding the truth in the gap between perception and reality. A new blog from the Scholarly Kitchen based on a report from Kudos based on two surveys (10,000+ researchers and 600+ librarians) and reviewed over 100 announcements, reports, posts, etc., from funders, institutions, librarians, and researchers. Key findings:

- Library budgets are being hit, badly.
- Researchers have been publishing more, not less.
- Funders seemed by and large to be holding steady.
